

+TOWN OF SECAUCUS
MAYOR AND COUNCIL MEETING - 10/22/2024

The town does not provide agenda for Council Meetings; however, below is a list of matters scheduled to be discussed which is intended to be a worksheet or reference sheet only for the Mayor and Council Members. No person shall rely on this sheet because scheduled items may be deleted and new items may be added, and Council Members may raise issues during the meeting and take action with respect to the same which are not listed herein.

PLEDGE OF ALLEGIANCE

OPEN PUBLIC MEETINGS ACT

ORDINANCES FOR PUBLIC HEARING

Ordinance No. 2024-23: Ordinance amending Chapter 127-58B of the Code of the Town of Secaucus entitled "Designation of Locations at or Near Private Residences" (Addition of handicapped parking spot on Irving Place and deletion of handicapped parking spaces for Front Street and Hudson Avenue)

ORDINANCES FOR INTRODUCTION

Ordinance No. 2024-25: Ordinance amending Chapter 116A of the Code of the Town of Secaucus entitled "Stormwater Control" addressing the Inland Flood Protection Rule

Ordinance No. 2024-26: An ordinance amending Chapter 116 of the Code of the Town of Secaucus to add Section 116C to regulate privately owned salt storage in the Town of Secaucus

RESOLUTIONS (CONSENT AGENDA)

PLEASE SEE CONSENT AGENDA FOR LIST OF RESOLUTIONS

PAYMENT OF CLAIMS

BINGO/RAFFLE APPLICATIONS

1) Application for an On-Premise Draw Raffle to be held on December 8, 2024, sponsored by St. Matthews Evangelical Lutheran Church

COMMUNICATIONS REQUIRING ACTION BY MAYOR AND COUNCIL

1) Request by Steven Perrotta AED of the Leonia Board of Education to use the Secaucus Recreation Center Pool on various weekdays and Saturdays from November to February for Swim Team Practice

COMMITTEE REPORTS

UNFINISHED BUSINESS

NEW BUSINESS

REMARKS OF CITIZENS

ADJOURNMENT

Town of Secaucus

CONSENT AGENDA – 10/22/24

THIS AGENDA IS FOR DISCUSSION PURPOSES AND IS SUBJECT TO CHANGE.
ITEMS MAY BE ADDED OR REMOVED AS DETERMINED BY THE TOWN COUNCIL.

- 1) Resolution approving Hudson County Board of Taxation Reductions for one (1) Secaucus property located at Block 141, Lot 5
- 2) Resolution approving Hudson County Board of Taxation Reductions for one (1) Secaucus property located at Block 77, Lot 7
- 3) A resolution on behalf of the Town of Secaucus approving Veteran Deduction for one (1) Secaucus property at Block 151, Lot 7
- 4) A resolution to amend a contract for the provision of an upfit for two (2) Ford Police Interceptors from Nielsen Ford of Morristown under New Jersey State Contract
- 5) A resolution on behalf of the Town of Secaucus declaring the Secaucus Volunteer Fire Department Engine 2 Firetruck as surplus property
- 6) A resolution on behalf of the Town of Secaucus authorizing the purchase of a 2024 Transit-250 Cargo Van from Route 23 Auto Mall
- 7) A resolution authorizing the award of a Non-Fair and Open Contract for the provision of a Walker Drive-On Mower to Matera Garden and Nursery Center
- 8) Resolution appointing Steven Vega to the Regular Part-Time Driver Position in the Social Services Department, pending the successful completion of a background check and drug screening, effective October 23, 2024, at the hourly rate of \$15.13
- 9) Resolution appointing Thomas Devany to the Regular Part-Time Position of Laborer in the Public Works Department, effective October 23, 2024, at the hourly rate of \$15.13
- 10) Resolution appointing Custodians, Clerical Personnel and Skateguards to the Secaucus Ice Rink, retroactive to October 10, 2024
- 11) Resolution providing for the insertion of a Special Item of Revenue in the Budget pursuant to N.J.S.A. 40A: 4-87 (CH. 159, P.L. 148) - public and private revenues offset by appropriations – CDBG, Dorigo Lane
- 12) Resolution providing for the insertion of a Special Item of Revenue in the Budget pursuant to N.J.S.A. 40A: 4-87 (CH. 159, P.L. 148) - public and private revenues offset by appropriations – Drunk Driving Enforcement Fund (DDEF) Grant
- 13) Resolution providing for the insertion of a Special Item of Revenue in the Budget pursuant to N.J.S.A. 40A: 4-87 (CH. 159, P.L. 148) - public and private revenues offset by appropriations – Green Acres, Ivanoski Park Grant

- 14) Resolution providing for the insertion of a Special Item of Revenue in the Budget pursuant to N.J.S.A. 40A: 4-87 (CH. 159, P.L. 148) - public and private revenues offset by appropriations – Clean Community FY24 Grant
- 15) Resolution providing for the insertion of a Special Item of Revenue in the Budget pursuant to N.J.S.A. 40A: 4-87 (CH. 159, P.L. 148) - public and private revenues offset by appropriations – LRIG, Buchmuller Park resurface

AN ORDINANCE OF
THE TOWN OF SECAUCUS, NEW JERSEY

ORDINANCE NO. 2024-23

AN ORDINANCE AMENDING SECTION 127-58B OF THE CODE OF THE TOWN OF SECAUCUS ENTITLED "DESIGNATION OF LOCATIONS AT OR NEAR PRIVATE RESIDENCES"

SECTION 1

NOW, THEREFORE, BE IT ORDAINED, by the Mayor and Council of the Town of Secaucus that Section 127-58B - "Designation of Locations at or Near Private Residences" shall be amended by adding the following location:

<u>NAME OF STREET</u>	<u>SIDE</u>	<u>LOCATION</u>
Irving Place	East	On the east side of Irving Place, beginning at a Point 56 feet north of the northeast corner of Centre Avenue and Irving Place continuing north for a distance of 20 feet in front of 754 Irving Place

That the parking space designated for 754 Irving Place adopted by Ordinance is to be personalized for Placard Number P2864599.

BE IT FURTHER ORDAINED, by the Mayor and Council of the Town of Secaucus that Section 127-58B - "Designation of Locations at or Near Private Residences" shall be amended by deleting the following locations:

<u>NAME OF STREET</u>	<u>SIDE</u>	<u>LOCATION</u>
Front Street	West	On the west side of Fourth Street, beginning at a Point 88 feet north of the northwest corner of Front Street and Fourth Street continuing north for a distance of 20 feet on the side of 240 Front St.

<u>NAME OF STREET</u>	<u>SIDE</u>	<u>LOCATION</u>
Hudson Avenue	West	On the west side of Hudson Avenue, beginning at a Point 127 feet north of the northwest corner of Mansfield Avenue and Hudson Avenue continuing north for a distance of 18 feet in front of 675 Hudson Avenue

SECTION 2

SEVERABILITY

BE IT FURTHER ORDAINED, that the provisions of this ordinance are separable and if any provision, clause, sentence, subsection, word or part thereof is held illegal, invalid, or unconstitutional, or inapplicable to any person or circumstance, such illegality, invalidity or unconstitutionality, or inapplicability shall not affect or impair any of the remaining provisions, clauses, sentences, subsections, words, or parts of the regulation or their application to other persons or circumstances. It is hereby declared to be the legislative intent that this ordinance would have been adopted if such illegal, invalid, or unconstitutional provision, clause, sentence, subsection, word or part had not been included therein, and if such persons or circumstances, to which the ordinance or part thereof is held inapplicable, had been specifically exempted therefrom.

SECTION 3

REPEALER

BE IT FURTHER ORDAINED, that all other ordinances or parts of ordinances inconsistent with this ordinance are hereby repealed, to the extent of such inconsistency.

SECTION 4

EFFECTIVE DATE

BE IT FURTHER ORDAINED, that this ordinance shall take effect upon passage and publication as provided by law.

**AN ORDINANCE OF
THE TOWN OF SECAUCUS, NEW JERSEY**

ORDINANCE NO. 2024-25

**AN ORDINANCE AMENDING CHAPTER 116A OF THE CODE OF THE
TOWN OF SECAUCUS ENTITLED “STORMWATER CONTROL” ADDRESSING
THE INLAND FLOOD PROTECTION RULE**

WHEREAS, the Town previously adopted Chapter 116A of the Code of the Town of Secaucus entitled “Stormwater Control”; and

WHEREAS, the New Jersey Department of Environmental Protection published new rules and regulations on July 17, 2023 (N.J.A.C. 7:8 et seq.) and set forth a model ordinance for municipalities for stormwater control and this has necessitated that Town Ordinance Chapter 116A be modified to reflect and comply with current DEP rules and regulations.

NOW, THEREFORE, BE IT ORDAINED by the Mayor and Council of the Town of Secaucus, County of Hudson, State of New Jersey, based on the above review, as follows:

1. Chapter 116A entitled “Stormwater Control” of the Code of the Town of Secaucus is hereby amended and supplemented to read as follows: (deletions are indicated by ~~crossouts~~; additions are indicated in **bold**):

Ordinance 116A– Stormwater Control

§116A-1. Scope and Purpose.

A. Policy Statement

Flood control, groundwater recharge, and pollutant reduction shall be achieved through the use of stormwater management measures, including green infrastructure Best Management Practices (GI BMPs) and nonstructural stormwater management strategies **otherwise known as low impact development (LID)**. GI BMPs and ~~low-impact development~~ (LID) should be utilized to meet the goal of maintaining natural hydrology to reduce stormwater runoff volume, reduce erosion, encourage infiltration and groundwater recharge, and reduce pollution. GI BMPs and LID should be developed based upon physical site conditions and the origin, nature and the anticipated quantity, or amount, of potential pollutants. Multiple stormwater management BMPs may be necessary to achieve the established performance standards for water quality, quantity, and groundwater recharge.

B. Purpose

The purpose of this ordinance is to establish minimum stormwater management requirements and controls for “major development,” as defined below in §116A-2.

C. Applicability

1. This ordinance shall be applicable to the following major developments:
 - a. Non-residential major developments; and
 - b. Aspects of residential major developments that are not pre-empted by the Residential Site Improvement Standards at N.J.A.C. 5:21.
2. This ordinance shall also be applicable to all major developments undertaken by Town of Secaucus.
3. **An application required by ordinance pursuant to §116A-1(C)(1) above that has been submitted prior to November 5, 2024, shall be subject to the stormwater management requirements in effect on November 4, 2024.**
4. **An application required by ordinance for approval pursuant to §116A-1(C)(1) above that has been submitted on or after March 2, 2021, but prior to November 5, 2024, shall be subject to the stormwater management requirements in effect on November 4, 2024.**
5. **Notwithstanding any rule to the contrary, a major development for any public roadway or railroad project conducted by a public transportation entity that has determined a preferred alternative or reached an equivalent milestone before July 17, 2023, shall be subject to the stormwater management requirements in effect prior to July 17, 2023.**

...

§116A-2. Definitions.

For the purpose of this ordinance, the following terms, phrases, words and their derivations shall have the meanings stated herein unless their use in the text of this Chapter clearly demonstrates a different meaning. When not inconsistent with the context, words used in the present tense include the future, words used in the plural number include the singular number, and words used in the singular number include the plural number. The word "shall" is always mandatory and not merely directory. The definitions below are the same as or based on the corresponding definitions in the Stormwater Management Rules at N.J.A.C. 7:8-1.2.

...

“Lead planning agency” means one or more public entities having stormwater management planning authority designated by the regional stormwater management planning committee pursuant to N.J.A.C. 7:8-3.2, that serves as the primary representative of the committee.

“Low impact development” means a development approach that uses practices to manage stormwater close to its source that results in or mimics that of natural hydrologic processes in order to preserve hydrologic and ecologic functions of receiving waters, such as preservation of natural landscape features, minimizing impervious surfaces, infiltration, evapotranspiration, or other use of stormwater.

...

“Pollutant” means any dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, refuse, oil, grease, sewage sludge, munitions, chemical wastes, biological materials, medical wastes, radioactive substance (except those regulated under the Atomic Energy Act of 1954, as amended (42 U.S.C. §§ 2011 *et seq.*)), thermal waste, wrecked or discarded equipment, rock, sand, cellar dirt, industrial, municipal, agricultural, and construction waste or runoff, or other residue discharged directly or indirectly to the land, ground waters or surface waters of the State, or to a domestic treatment works. “Pollutant” includes both hazardous and nonhazardous pollutants.

“Public roadway or railroad” means a pathway for use by motor vehicles or trains that is intended for public use and is constructed by, or on behalf of, a public transportation entity. A public roadway or railroad does not include a roadway or railroad constructed as part of a private development, regardless of whether the roadway or railroad is ultimately to be dedicated to and/or maintained by a governmental entity.

“Public transportation entity” means a Federal, State, county, or municipal government, an independent State authority, or a statutorily authorized public-private partnership program pursuant to P.L. 2018, c. 90 (N.J.S.A. 40A:11-52 *et seq.*), that performs a public roadway or railroad project that includes new construction, expansion, reconstruction, or improvement of a public roadway or railroad.

“Recharge” means the amount of water from precipitation that infiltrates into the ground and is not evapotranspired.

“Regulated impervious surface” means any of the following, alone or in combination:

1. ~~A net increase of~~ **All impervious surface within the project area limit of disturbance;**
2. The total area of impervious surface collected by a new stormwater conveyance system (for the purpose of this definition, a “new stormwater conveyance system” is a stormwater conveyance system that is constructed where one did not exist immediately prior to its construction or an existing system for which a new discharge location is created);
3. The total area of impervious surface proposed to be newly collected by an existing stormwater conveyance system; and/or
4. The total area of impervious surface collected by an existing stormwater conveyance system where the capacity of that conveyance system is increased.

...

§116A-3. Design and Performance Standards for Stormwater Management Measures.

- A. Stormwater management measures for major development shall be designed to provide erosion control, groundwater recharge, stormwater runoff quantity control, and stormwater runoff quality treatment as follows:

1. The minimum standards for erosion control are those established under the Soil and Sediment Control Act, N.J.S.A. 4:24-39 *et seq.*, and implementing rules at N.J.A.C. 2:90.
 2. The minimum standards for groundwater recharge, stormwater quality, and stormwater runoff quantity shall be met by incorporating green infrastructure.
 - a. **A site may be below the area threshold for §116A-3(A)(1), but are still subject to the requirements of §116A-3(A)(2).**
- B. The standards in this ordinance **that apply only to new major development and** are intended to minimize the impact of stormwater runoff on water quality and water quantity in receiving water bodies and maintain groundwater recharge. The standards do not apply to new major development to the extent that alternative design and performance standards are applicable under a regional stormwater management plan or Water Quality Management Plan adopted in accordance with Department rules.

§116A-4. Stormwater Management Requirements for Major Development.

- E. Tables 1 through 3 below summarize the ability of stormwater best management practices identified and described in the New Jersey Stormwater Best Management Practices Manual to satisfy the green infrastructure, groundwater recharge, stormwater runoff quality and stormwater runoff quantity standards specified in §116A-4(O), (P), (Q) and (R). When designed in accordance with the most current version of the New Jersey Stormwater Best Management Practices Manual, the stormwater management measures found at N.J.A.C. 7:8-5.2 (f) Tables 5-1, 5-2 and 5-3 and listed below in Tables 1, 2 and 3 are presumed to be capable of providing stormwater controls for the design and performance standards as outlined in the tables below. Upon amendments of the New Jersey Stormwater Best Management Practices to reflect additions or deletions of BMPs meeting these standards, or changes in the presumed performance of BMPs designed in accordance with the New Jersey Stormwater BMP Manual, the Department shall publish in the New Jersey Registers a notice of administrative change revising the applicable table. The most current version of the BMP Manual can be found on the Department's website at:

~~<https://njstormwater.org/bmp-manual2.htm>~~ <https://dep.nj.gov/stormwater/bmp-manual/>.

...

P. Groundwater Recharge Standards

1. This subsection contains the minimum design and performance standards for groundwater recharge **for Major Development** as follows:
2. The design engineer shall, using the assumptions and factors for stormwater runoff and groundwater recharge calculations at §116A-5, either:
 - i. Demonstrate through hydrologic and hydraulic analysis that the site and its stormwater management measures maintain 100 percent of the average annual pre-construction groundwater recharge volume for the site; or
 - ii. Demonstrate through hydrologic and hydraulic analysis that the increase of stormwater runoff volume from pre-construction to post-construction for the

projected 2-year storm, as defined and determined pursuant to §116A-5(D) of this ordinance, is infiltrated.

3. This groundwater recharge requirement does not apply to projects within the “urban redevelopment area,” or to projects subject to 4 below.
4. The following types of stormwater shall not be recharged:
 - i. Stormwater from areas of high pollutant loading. High pollutant loading areas are areas in industrial and commercial developments where solvents and/or petroleum products are loaded/unloaded, stored, or applied, areas where pesticides are loaded/unloaded or stored; areas where hazardous materials are expected to be present in greater than “reportable quantities” as defined by the United States Environmental Protection Agency (EPA) at 40 CFR 302.4; areas where recharge would be inconsistent with Department approved remedial action work plan **approved pursuant to the Administrative Requirements for the Remediation of Contaminated Sites rules, N.J.A.C. 7:26C, or Department** landfill closure plan and areas, **and areas** with high risks for spills of toxic materials, such as gas stations and vehicle maintenance facilities; and
 - ii. Industrial stormwater exposed to “source material.” “Source material” means any material(s) or machinery, located at an industrial facility, that is directly or indirectly related to process, manufacturing or other industrial activities, which could be a source of pollutants in any industrial stormwater discharge to groundwater. Source materials include, but are not limited to, raw materials; intermediate products; final products; waste materials; by-products; industrial machinery and fuels, and lubricants, solvents, and detergents that are related to process, manufacturing, or other industrial activities that are exposed to stormwater.

...

R. Stormwater Runoff Quantity Standards

1. This subsection contains the minimum design and performance standards to control stormwater runoff quantity impacts of major development.
2. In order to control stormwater runoff quantity impacts, the design engineer shall, using the assumptions and factors for stormwater runoff calculations at §116A-5, complete one of the following:
 - i. Demonstrate through hydrologic and hydraulic analysis that for stormwater leaving the site, post-construction runoff hydrographs for the **current and projected 2-, 10-, and 100-year storm events, as defined and determined in §116A-5(C) and (D), respectively, of this ordinance**, do not exceed, at any point in time, the pre-construction runoff hydrographs for the same storm events;
 - ii. Demonstrate through hydrologic and hydraulic analysis that there is no increase, as compared to the pre-construction condition, in the peak runoff rates of stormwater leaving the site for the **current and projected 2-, 10- and 100-year storm events, as defined and determined in §116A-5(C) and (D), respectively, of this ordinance**, and that the increased volume or change in timing of stormwater runoff will not increase flood damage at or downstream of the site. This analysis shall include the analysis of impacts of existing land uses and projected land uses assuming full development under existing zoning and land use ordinances in the drainage area;

...

§116A-5. Calculation of Stormwater Runoff and Groundwater Recharge.

A. Stormwater runoff shall be calculated in accordance with the following:

1. The design engineer shall calculate runoff using ~~one of~~ the following methods:
 - i. The USDA Natural Resources Conservation Service (NRCS) methodology, including the NRCS Runoff Equation and Dimensionless Unit Hydrograph, as described in Chapters 7, 9, 10, 15 and 16 Part 630, Hydrology National Engineering Handbook, incorporated herein by reference as amended and supplemented. This methodology is additionally described in *Technical Release 55 - Urban Hydrology for Small Watersheds* (TR-55), dated June 1986, incorporated herein by reference as amended and supplemented. Information regarding the methodology is available from the Natural Resources Conservation Service website at:

~~https://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb1044171.pdf~~
~~<https://directives.sc.egov.usda.gov/viewerFS.aspx?hid=21422>~~

or at United States Department of Agriculture Natural Resources Conservation Service, **New Jersey State Office**, 220 Davison Avenue, Somerset, New Jersey 08873; or

- ~~ii. The Rational Method for peak flow and the Modified Rational Method for hydrograph computations. The rational and modified rational methods are described in "Appendix A-9 Modified Rational Method" in the Standards for Soil Erosion and Sediment Control in New Jersey, January 2014. This document is available from the State Soil Conservation Committee or any of the Soil Conservation Districts listed at N.J.A.C. 2:90-1.3(a)3. The location, address, and telephone number for each Soil Conservation District is available from the State Soil Conservation Committee, PO Box 330, Trenton, New Jersey 08625. The document is also available at:~~

~~<http://www.nj.gov/agriculture/divisions/anr/pdf/2014NJSoilErosionControlStandardsComplete.pdf>~~

2. For the purpose of calculating **curve numbers runoff coefficients** and groundwater recharge, there is a presumption that the pre-construction condition of a site or portion thereof is a wooded land use with good hydrologic condition. The term "**curve number runoff coefficient**" applies to both the NRCS methodology above at §116A-5(A)(1)(i) and the Rational and Modified Rational Methods at §116A-5(A)(1)(ii). A **curve number runoff coefficient** or a groundwater recharge land cover for an existing condition may be used on all or a portion of the site if the design engineer verifies that the hydrologic condition has existed on the site or portion of the site for at least five years without interruption prior to the time of application. If more than one land cover ~~has~~ **has** existed on the site during the five years immediately prior to the time of application, the land cover with the lowest runoff potential shall be used for the computations. In addition, there is the presumption that the site is in good hydrologic condition (if the land use type is pasture, lawn, or park), with good cover (if the land use type is woods), or with good hydrologic condition and conservation treatment (if the land use type is cultivation).

...

C. The precipitation depths of the current 2-, 10-, and 100-year storm events shall be determined by multiplying the values determined in accordance with items 1 and 2 below:

1. The applicant shall utilize the National Oceanographic and Atmospheric Administration (NOAA), National Weather Service's Atlas 14 Point Precipitation Frequency Estimates: NJ, in accordance with the location(s) of the drainage area(s) of the site. This data is available at:

https://hdsc.nws.noaa.gov/hdsc/pfds/pfds_map_cont.html?bkmrk=nj; and

2. The applicant shall utilize Table 5: Current Precipitation Adjustment Factors below, which sets forth the applicable multiplier for the drainage area(s) of the site, in accordance with the county or counties where the drainage area(s) of the site is located. Where the major development lies in more than one county, the precipitation values shall be adjusted according to the percentage of the drainage area in each county. Alternately, separate rainfall totals can be developed for each county using the values in the table below.

Table 5: Current Precipitation Adjustment Factors

County	Current Precipitation Adjustment Factors		
	2-year Design Storm	10-year Design Storm	100-year Design Storm
Bergen	1.01	1.03	1.06
Essex	1.01	1.03	1.06
Hudson	1.03	1.05	1.09
Union	1.01	1.03	1.06

- D. Table 6: Future Precipitation Change Factors provided below sets forth the change factors to be used in determining the projected two-, 10-, and 100-year storm events for use in this chapter, which are organized alphabetically by county. The precipitation depth of the projected two-, 10-, and 100-year storm events of a site shall be determined by multiplying the precipitation depth of the two-, 10-, and 100-year storm events determined from the National Weather Service's Atlas 14 Point Precipitation Frequency Estimates pursuant to (c)1 above, by the change factor in the table below, in accordance with the county or counties where the drainage area(s) of the site is located. Where the major development and/or its drainage area lies in more than one county, the precipitation values shall be adjusted according to the percentage of the drainage area in each county. Alternately, separate rainfall totals can be developed for each county using the values in the table below.

Table 6: Future Precipitation Change Factors

County	Future Precipitation Change Factors		
	2-year Design Storm	10-year Design Storm	100-year Design Storm

Bergen	1.20	1.23	1.37
Essex	1.19	1.22	1.33
Hudson	1.19	1.19	1.23
Union	1.20	1.23	1.35

§116A-6. Sources for Technical Guidance.

- A. Technical guidance for stormwater management measures can be found in the documents listed below, which are available to download from the Department's website at:

~~http://www.nj.gov/dep/stormwater/bmp_manual2.htm~~
<https://dep.nj.gov/stormwater/bmp-manual/>.

1. Guidelines for stormwater management measures are contained in the New Jersey Stormwater Best Management Practices Manual, as amended and supplemented. Information is provided on stormwater management measures such as, but not limited to, those listed in Tables 1, 2, and 3.
2. Additional maintenance guidance is available on the Department's website at:

~~https://www.njstormwater.org/maintenance_guidance.htm~~
<https://dep.nj.gov/stormwater/maintenance-guidance/>.

- B. Submissions required for review by the Department should be mailed to:

~~The Division of Water Quality, New Jersey Department of Environmental Protection, Mail Code 401-02B, PO Box 420, Trenton, New Jersey 08625-0420. The Division of Watershed Protection and Restoration, New Jersey Department of Environmental Protection, Mail Code 501-02A, PO Box 420, Trenton, New Jersey 08625-0420.~~

...

§116A-8. Safety Standards for Stormwater Management Basins.

- A. This section sets forth requirements to protect public safety through the proper design and operation of stormwater management BMPs. This section applies to any new stormwater management BMP.
- B. The provisions of this section are not intended to preempt more stringent municipal or county safety requirements for new or existing stormwater management BMPs. Municipal and county stormwater management plans and ordinances may, pursuant to their authority, require existing stormwater management BMPs to be retrofitted to meet one or more of the safety standards in §116A-8(C)(1), -8(C)(2), and -8(C)(3) for trash racks, overflow grates, and escape provisions at outlet structures.
- C. Requirements for Trash Racks, Overflow Grates and Escape Provisions
 1. A trash rack is a device designed to catch trash and debris and prevent the clogging of outlet structures. Trash racks shall be installed at the intake to the outlet from the Stormwater management BMP to ensure proper functioning of the BMP outlets in accordance with the following:

- i. The trash rack shall have parallel bars, with no greater than six-inch spacing between the bars;
 - ii. The trash rack shall be designed so as not to adversely affect the hydraulic performance of the outlet pipe or structure;
 - iii. The average velocity of flow through a clean trash rack is not to exceed 2.5 feet per second under the full range of stage and discharge. Velocity is to be computed on the basis of the net area of opening through the rack; and
 - iv. The trash rack shall be constructed of rigid, durable, and corrosion resistant material and designed to withstand a perpendicular live loading of 300 pounds per square foot.
- 2. An overflow grate is designed to prevent obstruction of the overflow structure. If an outlet structure has an overflow grate, such grate shall meet the following requirements:
 - i. The overflow grate shall be secured to the outlet structure but removable for emergencies and maintenance.
 - ii. The overflow grate spacing shall be no **greater less** than two inches across the smallest dimension
 - iii. The overflow grate shall be constructed and installed to be rigid, durable, and corrosion resistant, and shall be designed to withstand a perpendicular live loading of 300 pounds per square foot.

...

§116A-9. Requirements for a Site Development Stormwater Plan:

- i. Submission of Site Development Stormwater Plan
 - 1. Whenever an applicant seeks municipal approval of a development subject to this ordinance, the applicant shall submit all of the required components of the Checklist for the Site Development Stormwater Plan at §116A-9(C) below as part of the submission of the application for approval.
 - 2. The applicant shall demonstrate that the project meets the standards set forth in this ordinance.
 - 3. The applicant shall submit three (3) copies of the materials listed in the checklist for site development stormwater plans in accordance with §116A-9(C) of this ordinance.
- ii. Site Development Stormwater Plan Approval

The applicant's Site Development project shall be reviewed as a part of the review process by the municipal board or official from which municipal approval is sought. That municipal board or official shall consult the municipality's review engineer to determine if all of the checklist requirements have been satisfied and to determine if the project meets the standards set forth in this ordinance.
- iii. Submission of Site Development Stormwater Plan

The following information shall be required:

 - 1. Topographic Base Map

The reviewing engineer may require upstream tributary drainage system information as necessary. It is recommended that the topographic base map of the site be submitted which extends a minimum of 200 feet beyond the limits of the proposed development, at a scale of 1"=200' or greater, showing 2-foot contour intervals. The map as appropriate may indicate the following: existing surface water drainage, shorelines, steep slopes, soils, erodible soils, perennial or intermittent streams that drain into or upstream of the Category One waters, wetlands and flood plains along with their appropriate buffer strips, marshlands and other wetlands, pervious or vegetative surfaces, existing man-made structures, roads, bearing and distances of property lines, and significant natural and manmade features not otherwise shown.

2. Environmental Site Analysis

A written and graphic description of the natural and man-made features of the site and its surroundings should be submitted. This description should include a discussion of soil conditions, slopes, wetlands, waterways and vegetation on the site. Particular attention should be given to unique, unusual, or environmentally sensitive features and to those that provide particular opportunities or constraints for development. **Incorporation of nonstructural strategies demonstrates adherence to a LID approach. The written description should include a list of the following nonstructural strategies with a clear yes/no indication of if the strategy was included in the plan and brief description:**

- i. **Protect areas that provide water quality benefits or areas particularly susceptible to erosion and sediment loss;**
- ii. **Minimize impervious surfaces and break up or disconnect the flow of runoff over impervious surfaces;**
- iii. **Maximize the protection of natural drainage features and vegetation;**
- iv. **Minimize the decrease in "time of concentration" from pre-construction to post-construction. "Time of concentration" is defined as the time it takes for runoff to travel from the hydraulically most distant point of the drainage area to the point of interest within a watershed;**
- v. **Minimize land disturbance including clearing and grading;**
- vi. **Minimize soil compaction;**
- vii. **Provide low-maintenance landscaping that encourages retention and planting of native vegetation and minimizes the use of lawns, fertilizers and pesticides;**
- viii. **Provide vegetated open-channel conveyance systems discharging into and through stable vegetated areas; and**
- ix. **Provide other source controls to prevent or minimize the use or exposure of pollutants at the site in order to prevent or minimize the release of those pollutants into stormwater runoff. These source controls include, but are not limited to:**
 1. **Site design features that help to prevent accumulation of trash and debris in drainage systems;**
 2. **Site design features that help to prevent discharge of trash and debris in drainage systems;**

3. **Site design features that help to prevent and/or contain spills or other harmful accumulations of pollutants at industrial or commercial developments; and**
4. **When establishing vegetation after land disturbance, applying fertilizer in accordance with the requirements established under the Soil Erosion and Sediment Control Act, N.J.S.A. 4:24-39 et seq., and implementing rules.**

...

§116A-10. Maintenance and Repair.

A. Applicability

Projects subject to review as in §116A-1(C) of this ordinance shall comply with the requirements of §116A-10(B) and §116A-10(C).

B. General Maintenance

1. The design engineer shall prepare a maintenance plan for the stormwater management measures incorporated into the design of a major development.
2. The maintenance plan shall contain specific preventative maintenance tasks and schedules; cost estimates, including estimated cost of sediment, debris, or trash removal; and the name, address, and telephone number of the person or persons responsible for preventative and corrective maintenance (including replacement). The plan shall contain information on BMP location, design, ownership, maintenance tasks and frequencies, and other details as specified in Chapter 8 of the NJ BMP Manual, as well as the tasks specific to the type of BMP, as described in the applicable chapter containing design specifics.
3. If the maintenance plan identifies a person other than the property owner (for example, a developer, a public agency or homeowners' association) as having the responsibility for maintenance, the plan shall include documentation of such person's or entity's agreement to assume this responsibility, or of the owner's obligation to dedicate a stormwater management facility to such person under an applicable ordinance or regulation.
4. Responsibility for maintenance shall not be assigned or transferred to the owner or tenant of an individual property in a residential development or project, unless such owner or tenant owns or leases the entire residential development or project. The individual property owner may be assigned incidental tasks, such as weeding of a green infrastructure BMP, provided the individual agrees to assume these tasks; however, the individual cannot be legally responsible for all of the maintenance required.
5. If the party responsible for maintenance identified under §116A-10(B)(3) above is not a public agency, the maintenance plan and any future revisions based on §116A-10(B)(7) below shall be recorded upon the deed of record for each property on which the maintenance described in the maintenance plan must be undertaken.
6. Preventative and corrective maintenance shall be performed to maintain the functional parameters (storage volume, infiltration rates, inflow/outflow capacity,

etc.) of the stormwater management measure, including, but not limited to, repairs or replacement to the structure; removal of sediment, debris, or trash; restoration of eroded areas; snow and ice removal; fence repair or replacement; restoration of vegetation; and repair or replacement of non-vegetated linings.

7. The party responsible for maintenance identified under §116A-10(B)(3) above shall perform all of the following requirements:
 - i. maintain a detailed log of all preventative and corrective maintenance for the structural stormwater management measures incorporated into the design of the development, including a record of all inspections and copies of all maintenance-related work orders; and
 - ii. evaluate the effectiveness of the maintenance plan at least once per year and adjust the plan and the deed as needed; and
 - iii. retain and make available, upon request by any public entity with administrative, health, environmental, or safety authority over the site, the maintenance plan and the documentation required by §116A-10(B)(6) and §116A-10(B)(7) above.
8. The requirements of §116A-10(B)(3) and §116A-10(B)(4) do not apply to stormwater management facilities that are dedicated to and accepted by the municipality or another governmental agency, subject to all applicable municipal stormwater general permit conditions, as issued by the Department. **Maintenance and inspection guidance can be found on the Department's website at:**

<https://dep.nj.gov/stormwater/maintenance-guidance/>

...

2. All Ordinances and parts of Ordinances inconsistent herewith are hereby repealed to the extent of such inconsistency.
3. If any section, paragraph, subdivision, clause or provision of this Ordinance shall be adjudged invalid, such adjudication shall apply only to that section, subdivision, clause or provision so adjudged and the remainder of this Ordinance shall be deemed to be valid and effective.
4. The County Planning Board shall be provided notice of this proposed ordinance in accordance with N.J.S.A. 40:27-6.10.
5. This shall take effect immediately upon passage and publication in accordance with law.

I, Michael Marra, Town Clerk of the Town of Secaucus, County of Hudson, do hereby certify that the above is a true copy of an ordinance introduced and passed on first reading on October 22, 2024 and finally adopted by the Mayor and Council on November 12, 2024.

Town Clerk

Mayor

**AN ORDINANCE OF
THE TOWN OF SECAUCUS, NEW JERSEY**

ORDINANCE NO. 2024-26

**AN ORDINANCE AMENDING CHAPTER 116 OF THE CODE OF THE
TOWN OF SECAUCUS TO ADD SECTION 116C TO REGULATE PRIVATELY
OWNED SALT STORAGE IN THE TOWN OF SECAUCUS**

WHEREAS, on July 7, 2023, the New Jersey Department of Environmental Protection (“NJDEP”) amended its Stormwater Management Regulations, N.J.A.C. 7:8 et seq.;

WHEREAS, the NJDEP has promulgated a model Privately Owned Salt Storage ordinance to establish requirements for the storage of salt and other solid de-icing materials on privately owned properties to prevent them from being exposed to stormwater; and

WHEREAS, the Town of Secaucus now wishes to adopt the within ordinance based on the NJDEP Privately Owned Salt Storage model ordinance to reflect and comply with current NJDEP rules and regulations.

NOW, THEREFORE, BE IT ORDAINED by the Mayor and Council of the Town of Secaucus, County of Hudson, State of New Jersey, based on the above review, as follows:

1. Chapter 116 of the Code of the Town of Secaucus is hereby amended and supplemented to read as follows:

Ordinance 116C-- Privately Owned Salt Storage

§116C-1. Purpose.

The purpose of this ordinance is to prevent stored salt and other solid de-icing materials from being exposed to stormwater.

This ordinance establishes requirements for the storage of salt and other solid de-icing materials on properties not owned or operated by the municipality (privately-owned), including residences, in the Town of Secaucus to protect the environment, public health, safety and welfare, and to prescribe penalties for failure to comply.

§116C-2. Definitions.

For the purpose of this ordinance, the following terms, phrases, words and their derivations shall have the meanings stated herein unless their use in the text of this Chapter clearly demonstrates a different meaning. When consistent with the context, words used in the present tense include the future, words used in the plural number include the singular number, and words used in the singular number include the plural number. The word “shall” is always mandatory and not merely directory.

“De-icing materials” means any granular or solid material such as melting salt or any other granular solid that assists in the melting of snow.

“Impervious surface” means a surface that has been covered with a layer of material so that it is highly resistant to infiltration by water.

“Storm drain inlet” means the point of entry into the storm sewer system.

“Permanent structure” means a permanent building or permanent structure that is anchored to a permanent foundation with an impermeable floor, and that is completely roofed and walled (new structures require a door or other means of sealing the access way from wind driven rainfall).

A fabric frame structure is a permanent structure if it meets the following specifications:

1. Concrete blocks, jersey barriers or other similar material shall be placed around the interior of the structure to protect the side walls during loading and unloading of de-icing materials;
2. The design shall prevent stormwater run-on and run through, and the fabric cannot leak;
3. The structure shall be erected on an impermeable slab;
4. The structure cannot be open sided; and
5. The structure shall have a roll up door or other means of sealing the access way from wind driven rainfall.

“Person” means any individual, corporation, company, partnership, firm, association, or political subdivision of this State subject to municipal jurisdiction.

“Resident” means a person who resides on a residential property where de-icing material is stored.

§116C-3. Deicing Material Storage Requirements.

A. Temporary outdoor storage of de-icing materials in accordance with the requirements below is allowed between October 15th and April 15th:

1. Loose materials shall be placed on a flat, impervious surface in a manner that prevents stormwater run-through;
2. Loose materials shall be placed at least 50 feet from surface water bodies, storm drain inlets, ditches and/or other stormwater conveyance channels;
3. Loose materials shall be maintained in a cone-shaped storage pile. If loading or unloading activities alter the cone-shape during daily activities, tracked materials shall be swept back into the storage pile, and the storage pile shall be reshaped into a cone after use;
4. Loose materials shall be covered as follows:
 - a. The cover shall be waterproof, impermeable, and flexible;
 - b. The cover shall extend to the base of the pile(s);
 - c. The cover shall be free from holes or tears;

- d. The cover shall be secured and weighed down around the perimeter to prevent removal by wind; and
 - e. Weight shall be placed on the cover(s) in such a way that minimizes the potential of exposure as materials shift and runoff flows down to the base of the pile.
 - (1) Sandbags lashed together with rope or cable and placed uniformly over the flexible cover, or poly-cord nets provide a suitable method. Items that can potentially hold water (e.g., old tires) shall not be used;
 - 5. Containers must be sealed when not in use; and
 - 6. The site shall be free of all de-icing materials between April 16th and October 14th.
- B. De-icing materials should be stored in a permanent structure if a suitable storage structure is available. For storage of loose de-icing materials in a permanent structure, such storage may be permanent, and thus not restricted to October 15 -April 15.
- C. All such temporary and/or permanent structures must also comply with all other local ordinances, including building and zoning regulations.
- D. The property owner, or owner of the de-icing materials if different, shall designate a person(s) responsible for operations at the site where these materials are stored outdoors, and who shall document that weekly inspections are conducted to ensure that the conditions of this ordinance are met. Inspection records shall be kept on site and made available to the municipality upon request.
- 1. Residents who operate businesses from their homes that utilize de-icing materials are required to perform weekly inspections.

§116C-4. Exemptions.

Residents may store de-icing materials outside in a solid-walled, closed container that prevents precipitation from entering and exiting the container, and which prevents the de-icing materials from leaking or spilling out. Under these circumstances, weekly inspections are not necessary, but repair or replacement of damaged or inadequate containers shall occur within 2 weeks.

If containerized (in bags or buckets) de-icing materials are stored within a permanent structure, they are not subject to the storage and inspection requirements in Section III above. Piles of de-icing materials are not exempt, even if stored in a permanent structure.

This ordinance does not apply to facilities where the stormwater discharges from de-icing material storage activities are regulated under another NJPDES permit.

§116C-5. Enforcement.

This ordinance shall be enforced by the Construction Code Official, Environmental Director, Board of Health and Police Department of the Town of Secaucus, or their designees during the course of ordinary enforcement duties.

§116C-6. Violations and Penalties.

Any person(s) who is found to be in violation of the provisions of this ordinance shall have 72 hours to complete corrective action. Repeat violations and/or failure to complete corrective action shall result in a fine not exceeding \$1,000, by imprisonment for a term not exceeding 90 days or by a period of community service for not more than 90 days, or any combination thereof. A separate offense shall be deemed committed on each day during or on which a violation occurs or continues.

§116C-7. Severability.

Each section, subsection, sentence, clause, and phrase of this Ordinance is declared to be an independent section, subsection, sentence, clause, and phrase, and finding or holding of any such portion of this Ordinance to be unconstitutional, void, or ineffective for any cause or reason shall not affect any other portion of this Ordinance.

§116C-8. Effective Date.

This Ordinance shall be in full force and effect from and after its adoption and any publication as may be required by law.

2. All Ordinances and parts of Ordinances inconsistent herewith are hereby repealed to the extent of such inconsistency.
3. If any section, paragraph, subdivision, clause or provision of this Ordinance shall be adjudged invalid, such adjudication shall apply only to that section, subdivision, clause or provision so adjudged and the remainder of this Ordinance shall be deemed to be valid and effective.
4. The County Planning Board shall be provided notice of this proposed ordinance in accordance with N.J.S.A. 40:27-6.10.
5. This shall take effect immediately upon passage and publication in accordance with law.

I, Michael Marra, Town Clerk of the Town of Secaucus, County of Hudson, do hereby certify that the above is a true copy of an ordinance introduced and passed on first reading on October 22, 2024 and finally adopted by the Mayor and Council on November 12, 2024.

Resolution No. _____

**TOWN OF SECAUCUS
COUNTY OF HUDSON, STATE OF NEW JERSEY**

**A RESOLUTION ON BEHALF OF THE TOWN OF SECAUCUS DECLARING THE
SECAUCUS VOLUNTEER FIRE DEPARTMENT ENGINE 2 FIRE TRUCK AS
SURPLUS PROPERTY**

WHEREAS, the Town of Secaucus may dispose of surplus items pursuant to Local Public Contracts Law, N.J.S.A. 40A:1-36; and

WHEREAS, the Town of Secaucus' Volunteer Fire Department has a truck that is deemed surplus; and

WHEREAS, based upon the above and upon the recommendation of the Secaucus Volunteer Fire Department, due to the replacement of the Engine 2 Seagrave Pumper Firetruck with an updated truck to meet the needs of the Department; and

WHEREAS, the Engine 2 Seagrave Pumper Firetruck shall be turned over to North Hudson Regional Fire and Rescue ("NHRFR"), 11 Port Imperial Boulevard, West New York, New Jersey 07093, which operates under a Municipal entity in the State of New Jersey, as NHRFR provides mutual aid to the Town of Secaucus when necessary, and the transfer of the truck better facilitates the continued mutual aid, and in the interest of public safety, health and welfare that will securely transfer the Seagrave Pumper Firetruck at no cost to the Town of Secaucus and said company further represents that the Engine 2 Seagrave Pumper Firetruck will be used by NHRFR in the interest of public safety; and

WHEREAS, prior to the transfer of the Firetruck, NHRFR shall provide proof to the Town of Secaucus that title has been transferred and the vehicle is insured; and

WHEREAS, the Firetruck is being transfer in "as-is and where-is" condition and the Town of Secaucus makes no representations as to the condition or functioning of the vehicle.

NOW, THEREFORE, BE IT RESOLVED, that the Mayor and the Town Council in the Town of Secaucus, County of Hudson, in the State of New Jersey, declare that the following Secaucus Volunteer Fire Department item as surplus and approve the transfer of such from the Secaucus Volunteer Fire Department to NHRFR:

Name of Item	Identification Number or Other Description
2001 Seagrave Custom Pumper	VIN # 1F9E028J81CST2024

BE IT FURTHER RESOLVED, that it has been determined that the above referenced item should be removed from the inventory as soon as practicable and that the transfer of the above item shall be at no cost to the Town of Secaucus; and

BE IT FURTHER RESOLVED, that the Mayor or Town Administrator or their designee, is hereby authorized to enter into any necessary agreements and take any action necessary to effectuate the spirit and intent of this Resolution.

Adopted: October 22, 2024

Resolution No. _____

**TOWN OF SECAUCUS
COUNTY OF HUDSON, STATE OF NEW JERSEY**

**A RESOLUTION AUTHORIZING THE AWARD OF A NON-FAIR AND OPEN CONTRACT
FOR THE PROVISION OF A WALKER DRIVE-ON MOWER TO MATERA GARDEN AND
NURSERY CENTER**

WHEREAS, the Town of Secaucus Department of Public Works has determined the need for the Provision of a Walker Drive-On Mower to service the Town of Secaucus; and

WHEREAS, the Town of Secaucus Department of Public Works obtained three (3) quotes for said Mower; and

WHEREAS, Matera Garden and Nursery Center of Ridgefield, NJ provided quote #375625 in the amount of Seventeen Thousand Seven Hundred Sixty-Four Dollars and 75/100 (\$17,764.75); and

WHEREAS, that the Finance Director certifies that funds are available for these services under line-item C-04-55-2024-2060

NOW THEREFORE, BE IT RESOLVED, that the Mayor and Council for the Town of Secaucus, County of Hudson, State of New Jersey authorize the award a Non-Fair and Open contract to Matera Garden and Nursery Center for the Provision of a Walker Drive-On Mower as described herein, for an amount not to exceed Seventeen Thousand Seven Hundred Sixty-Four Dollars and 75/100 (\$17,764.75); and

BE IT FURTHER RESOLVED, that Matera Garden and Nursey shall submit a Chapter 271 Political Disclosure Form which certifies that they each have not made any reportable contributions to a political or candidate committee in the Town of Secaucus, in the County of Hudson, in any public entity in Hudson County, or in the 32nd Legislative District in the previous twelve (12) months, and that the contract will prohibit them from making any reportable contributions through the term of the contract, in compliance with necessary regulations and measure of the State of New Jersey under N.J.S.A. 19:44A-20.26; and

BE IT FURTHER RESOLVED, that Matera Garden and Nursery Center shall provide any and all compliance information requested by the Town of Secaucus Office of Purchasing; and

BE IT FURTHER RESOLVED, that the Mayor, Town Administrator, or their designee are hereby authorized to execute any documents regarding the awarding of this contract, or take any action necessary to effectuate the spirit and purpose of this resolution.

Adopted: October 22, 2024

I, Michael Marra, Town Clerk of the Town of Secaucus, County of Hudson, do hereby certify that the above is a true copy of a resolution approved by the Mayor and Council on October 22, 2024.

Resolution No. _____

**TOWN OF SECAUCUS
COUNTY OF HUDSON, STATE OF NEW JERSEY**

**A RESOLUTION ON BEHALF OF THE TOWN OF SECAUCUS AUTHORIZING
THE PURCHASE OF A 2024 TRANSIT-250 CARGO VAN FROM ROUTE 23 AUTOMALL**

WHEREAS, the Town of Secaucus Buildings and Grounds has determined the need to purchase a 2024 Transit-250 Cargo Van to service the Town of Secaucus; and

WHEREAS, the Town of Secaucus Buildings and Grounds has obtained a Quote from Route 23 Automall for a 2024 Transit-250 Cargo Van, in the amount of Fifty-Nine Thousand Eight Hundred Ninety-Six Dollars and 60/100 (\$59,896.60.00); and

WHEREAS, the services as set forth in the Proposal submitted by Route 23 Automall will be procured through Bergen County Cooperative Pricing System via Contract No.24-43 Cars, Crossovers, Class 1-3 Pickup Trucks/Chassis, Sport Utility Vehicles and Vans; and

WHEREAS, the Town of Secaucus is a member of the Bergen County Cooperative Pricing System previously authorized by Resolution 2014-346; and

WHEREAS, the Chief Financial Officer has determined that sufficient funds to award these contracts are available under line items C-04-55-2024-2030 @ \$58,000.00 and 4-01-25-1109-2022 @ 1,896.60

NOW THEREFORE, BE IT RESOLVED, that the Mayor and Council for the Town of Secaucus, County of Hudson, State of New Jersey award the purchase of a 2024 Transit-250 Van from Route 23 Automall in an amount not to exceed Fifty-Nine Thousand Eight Hundred Ninety-Six Dollars and 60/100 (\$59,896.60.00); and

BE IT FURTHER RESOLVED, that Route 23 Automall shall provide any and all compliance information requested by the Town of Secaucus Office of Purchasing; and

BE IT FURTHER RESOLVED, that the Mayor, Town Administrator, or their designee are hereby authorized to execute any documents regarding the awarding of this contract, or take any action necessary to effectuate the spirit and purpose of this resolution.

Adopted: October 22, 2024
